Mode/Platform/Location	Face-to-Face	Control No.	eLGU-R2-02-20-2026-S38
Participants	Attached Attendance		

I. RATIONALE

The ELGU Onsite Tech Support was conducted to provide direct technical assistance to the Local Government Unit (LGU) of Buguey, Cagayan, specifically addressing issues related to the Mapping and Surveying Fee (MAPSU) within the eLGU system. This initiative is crucial for ensuring the smooth and efficient operation of the eLGU system, which streamlines local government processes and enhances service delivery to constituents. By resolving technical difficulties on-site, the DICT aims to empower the LGU to fully utilize the eLGU system's capabilities.

The activity directly supports the DICT's mandate to promote and facilitate the use of ICT in local governance. Addressing technical challenges promptly ensures the continuity of essential services and promotes greater efficiency in local government operations. The onsite support helps build the capacity of LGU personnel, enabling them to independently manage and maintain the eLGU system, contributing to long-term sustainability and improved public service delivery.

II. ATTENDEES

A. Facilitator (DICT)

Name	Office	Gender
JAYMAR C. RECOLIZADO	DICT Regional Office II	M

B. NGAs / LGUs / SUCs and other Beneficiaries (please see attached attendance sheet)

NGAs		LGUs		SUCs		Others	
Male	Female	Male	Female	Male	Female	Male	Female
		2	4				

Male: 2 | Female: 4

C. Consolidated participants

Total number of male attendees	3
Total number of female attendees	4
Total number of attendees	7

III. HIGHLIGHTS OF DISCUSSION

The ELGU Onsite Tech Support in Buguey, Cagayan, focused on two key areas: calibration of fees for MAPSU (Mapping and Surveying Fee) and an introduction to eGovPay. The calibration of MAPSU fees involved adjusting the system settings to accurately reflect the LGU's approved rates, ensuring correct billing and revenue collection. This process required a thorough understanding of the eLGU system's configuration and careful attention to detail.

In addition to MAPSU calibration, participants were introduced to eGovPay, an electronic payment platform designed to facilitate online transactions for local government services. The introduction covered the features, benefits, and implementation process of eGovPay, aiming to encourage its adoption by the LGU to enhance convenience and transparency in financial transactions. The expected outcome is for LGU Buguey to have a more accurate and efficient system for MAPSU fees and to begin the process of integrating eGovPay into their existing eLGU system.
